

# Performance Software DISCLAIMER

Please read through carefully and fully

I confirm that my vehicle has been maintained in accordance with the manufacturer's recommendation including relevant cambelt changes/ timing chain maintenance and that the vehicle is in FULL and TOTAL road worthy condition.

I am therefore happy to allow my vehicle to be tuned at my own personal risk and thus absolving BRS MAPS of any responsibility should any failure occur. This includes remaps only.

Common failures are clutch, dpf, turbo, coil packs, egr valve and maf sensor. These are all serviceable items that would usually require replacement as part of good maintenance. BRS MAPS do not accept liability for any mechanical parts failure before, whilst and after performance tuning and we do not offer any types of warranty for your existing modifications.

DPF and EGR solution is for off road use ONLY.

Customers are aware that BRS MAPS does NOT know your vehicle, (wear and tear etc) or how it has been maintained (serviced regularly, health checked regularly) We are therefore unaware of any issues not reported on pre health check. It is therefore the customers responsibility to accept any damage to all serviceable parts before, during or after a remap is carried out. This includes clutch, dpf, turbos, egr valve, maf sensors, injectors etc.

The customer must report any issues they develop within 7 days of the work being carried out and will refrain from slanderous activity on or off social media without the sufficient evidence to back up any claims that our software has caused such problems. The customer accepts that if this is not adhered to, BRS MAPS have the right to seek legal action.

Here at BRS MAPS we offer a lifetime warranty on all our software, any problems at all we will run a full diagnostic scan and adjust the file if needed free of charge. If you came to us, you would need to bring the car back to us, or you may be charged a small fuel fee for us to come to you.

Please note:

The warranty stays with the vehicle and not the owner.

A receipt must be shown as proof of purchase, or you may be charged.

If the diagnostic brings up a problem which isn't map related you would be charged £40 diagnostic fee. If the car is taken to another tuner or garage this will void all warranty with us, as our software may have been tampered with.
